

## Referrals and Request

Weekly Report 11/26/18 - 12/2/18

One factor that was looming over this week was gaining interviews with professionals who could possibly be mentors. This feat was proving difficult as multiple messages were being left with one professional in particular who would have been an excellent candidate. However, after the fourth message was left for the doctor requesting an interview, the decision to focus more on the Dallas Veterinary Surgical Center was established. Seeing as the Dallas Veterinary Surgical Center holds a multitude of well trained surgeons there was great hope in obtaining an interview at one of their many locations. Similar to the previous doctor, there was no call back as well most likely to the doctor busy schedules. To combat this arising predicament, new approaches were made in obtaining an interview. Such approaches included using the contact request form found on their website to notify Dallas Veterinary Surgical Center as a whole in hopes that one of their Doctors would be available or willing for an interview. This will hopefully lead to an interview with an individual who is interested in me as well and from that a possible mentorship. Luckily, the Dallas Veterinary Surgical Center has responded to my request and correspondence in regards to setting up an interview are underway.
